Additional Copies Available

Additional copies of "World Motor Vehicle Data Book" may be secured for $25 each from the Statistics Department, MVMA, 300 New Center Building, Detroit, Michigan 48202. In the case of orders from overseas, mailing costs will be added.

PRESIDENT'S MESSAGE

The growth of MVMA's "World Motor Vehicle Data" publication since its inception in 1964 is testimony to the growing internationalism of the motor vehicle industry.

Fifteen years ago, our publication contained 76 pages and data from 14 countries. This edition — the largest and most comprehensive ever — contains 296 pages and data from 39 countries.

Clearly, the motor vehicle's impact is felt worldwide, making reliable statistics and data on production, imports, exports, registrations and sales increasingly important to business and industry decision-makers.

I'm sure that this 1979 edition of "World Motor Vehicle Data" will be an invaluable resource throughout the year.

V. J. ADDUCI
President

PREFACE

This statistical compilation of international motor vehicle data through 1978 includes production totals by manufacturers as well as by country. Since it is necessary to use different data sources from year to year, there are occasional differences in the number reported for various classes of vehicles for some countries. This is due to the lack of uniformity of definitions for certain vehicles. In such cases, car, truck and bus data vary from one source to another and, accordingly, in the year to year data reported.

Although special efforts have been made to segregate vehicle assembly data from production data, the world totals for production may include some duplication since it is not possible for all countries to identify assemblies from production.

The data in this report were supplied by foreign government agencies, trade associations, private services and the press. It should be noted that the basis on which the data are reported will vary. For example, vehicle output may be measured in terms of production, shipments, or factory sales. New vehicles sold may be measured in terms of retail sales or new registrations. Imports and exports are subject to problems of compilation and definition. As a result, data accuracies vary and international comparisons are, of course, affected by these discrepancies.

Inquiries on statistical information in "World Motor Vehicle Data" should be addressed to the Statistics Department of the Motor Vehicle Manufacturers Association.

"World Motor Vehicle Data" is prepared annually by the Statistics and Public Relations Departments of the Communications Division, Motor Vehicle Manufacturers Association of the United States, Inc.

Total Partly Finished Trucks and Truck Types		22,709		19,563
Partly Finished Cars, Station Wagons, Panel Vans and Utilities (a)		1,536		1,134
Total Finished and Partly Finished Vehicles		452,592		384,966

(a) Vehicles up to and including 2900 mm. wheelbase.
(b) Vehicles over 2900 mm. wheelbase.

NOTE: These statistics include production of vehicles from both Australian and imported components. The statistics of finished motor vehicles exclude vehicles finished by specialist body building establishments. The statistics of partly finished motor vehicles represent the production of vehicles to which some additional body work (except painting) is to be done by specialist body building establishments.

NOTE: Figures as of December 31, 1977
No allowance has been made for wastage, the figures for each year being obtained by deducting year by year the annual registrations from the total vehicles on the register.

* Excluding vehicles registered under classification of "Exempt Vehicles etc." as that total includes cars, trucks, tractors, graders, and other items of road-making equipment.
